

The Florida Cooperative Fish and Wildlife Research Unit at the University of Florida seeks a candidate to serve as a Post Doctoral Associate for a global climate change project on the West Coast of Florida. The post-doc will be involved in population modeling for an endangered vole, raptors, and fish. Experience with population modeling and a PhD are required. The successful candidate will work with faculty ranging from wildlife to fisheries issues. Excellent organization skills, ability to work independently, adaptability, and the capacity to work as a member of a team are very important. Candidates should send a cover letter and CV (with 3 professional references) to Dr. Christa Zweig (czweig@ufl.edu) by November 15, 2009.

The position is based in Gainesville, FL with a salary of \$50K/year + benefits. Intended starting date is January 2010 and will run for 1.5 years with possibility of extension.
